EDUCATION

Chitkara University

Bachelor of Computer Science Engineering

Punjab, India

Aug. 2022 – June 2026

Deakin University (Exchange Program)

Bachelor of Computer Science Engineering

Burwood, Melbourne

Aug. 2022 – June 2024

EXPERIENCE

Software Development Intern (QA & Testing)

Sprouts.ai

July 2025 – Feb. 2026

Mohali, India

- Designed and executed manual and automated test cases for REST APIs using Postman, validating request/response integrity and ensuring correctness of full-stack web application endpoints across staging and production environments.
- Collaborated with the MERN stack development team on JIRA to log, track, and verify bug fixes, gaining hands-on exposure to Agile sprint cycles, code reviews, and release pipelines.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, SQL

Frontend: Next.js, React.js, Tailwind CSS, Framer Motion, Web APIs

Backend: Node.js, Express.js, Socket.IO, REST APIs, JWT Authentication

Databases: PostgreSQL, Redis, MongoDB, Firebase Firestore, NoSQL

Real-time: WebRTC, Socket.IO, Web Push API, Service Workers

Developer Tools: Git, GitHub, Postman, VS Code, JIRA, Vercel, Render, PM2

Concepts: Full-Stack Development, Microservices, JWT Auth, OAuth2, Responsive Design, Agile/Scrum

PROJECTS

OpenChat | *Next.js 15, Node.js, Express.js, PostgreSQL, Redis, Socket.IO, WebRTC*

Jan. 2025 – Present

- Full-stack real-time peer-to-peer voice calling platform for college students with encrypted voice calls, messaging, and community forums — JWT auth, Google OAuth2, supporting 1,200+ concurrent users.
- Backend: Node.js, Express.js, Socket.IO for matching and signaling. Frontend: Next.js 15, Tailwind CSS v4, WebRTC with Perfect Negotiation, Web Push API. Redis for session management and rate limiting.
- PostgreSQL (Neon), Redis (Upstash), Node.js on Render; frontend on Vercel — sub-100ms WebSocket latency, 99.9% uptime with PM2 and Helmet security middleware.
- unibuddy-nu.vercel.app

FlexItOut | *Next.js, React.js, Node.js, Express.js, PostgreSQL, TensorFlow.js*

Feb. 2025 – Mar. 2025

- Developed a full-stack MERN AI fitness web application at the Bajaj Finserv Health Hackathon, featuring real-time pose detection, rep counting, and live form feedback using TensorFlow.js MoveNet — running entirely client-side for zero backend inference latency.
- Built scalable RESTful APIs with Node.js and Express.js to manage user profiles, workout history, and exercise plans, backed by PostgreSQL; integrated Firebase Authentication for secure sign-in and session management.
- Designed a responsive React.js dashboard with live pose skeleton overlay, rep counter, form accuracy scoring, and progress analytics — supporting Push-ups, Squats, and Crunches with angle-based form detection.
- flex-it-out.vercel.app

Hardik Portfolio | *Next.js 14, React.js, TypeScript, Tailwind CSS, Framer Motion*

Mar. 2026 – Present

- Built a modern, fully responsive portfolio website showcasing projects, skills, and technical experience — optimized for performance with Next.js 14 server-side rendering and static generation.
- Implemented smooth scroll animations, project showcases, contact form, resume download, and social integrations (GitHub, LinkedIn) using Framer Motion for engaging user interactions and modern UI patterns.
- hardik-portfolio-steel.vercel.app
