EDUCATION

Chitkara University

Bachelor of Computer Science Engineering

Punjab, India

Aug. 2022 – June 2026

Deakin University (Exchange Program)

Bachelor of Computer Science Engineering

Burwood, Melbourne

Aug. 2022 – June 2024

EXPERIENCE

Software Development Intern (QA & Testing)

July 2025 – Feb. 2026

Sprouts.ai

Mohali, India

- Designed and executed manual and automated test cases for REST APIs using Postman, validating request/response integrity and ensuring correctness of full-stack web application endpoints across staging and production environments.
- Collaborated with the MERN stack development team on JIRA to log, track, and verify bug fixes, gaining hands-on exposure to Agile sprint cycles, code reviews, and release pipelines.
- Identified edge cases and regression issues across front-end and back-end modules, contributing to a measurable reduction in post-release bug reports and improving overall product quality.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, SQL

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frameworks & Libraries: Next.js, Tailwind CSS, Framer Motion, TensorFlow.js, React Three Fiber

Databases: MongoDB, PostgreSQL, Firebase Firestore, NoSQL

Developer Tools: Git, GitHub, Postman, VS Code, JIRA, Vercel, Swagger UI

Concepts: REST API Design, JWT Authentication, Full-Stack Development, Responsive Web Design, Agile/Scrum, OOP

PROJECTS

Novel Hub | *MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Framer Motion*

Oct. 2024 – Dec. 2024

- Built a full-stack MERN web application — a novel reading community platform with trending novels, genre-based discovery, user rankings, community forum, and personalized reader/author dashboards.
- Developed scalable RESTful APIs with Node.js and Express.js to handle novel listings, user profiles, forum posts, and newsletter subscriptions, with MongoDB for persistent, structured data storage.
- Implemented responsive web design using React.js and Tailwind CSS with Framer Motion animations, private route protection, and a complete JWT-based authentication flow for readers and authors.
- novels-hub.vercel.app

FlexItOut | *MongoDB, Express.js, React.js, Node.js, Firebase, TensorFlow.js*

Feb. 2025 – Mar. 2025

- Developed a full-stack MERN AI fitness web application at the Bajaj Finserv Health Hackathon, featuring real-time pose detection, rep counting, and live form feedback using TensorFlow.js MoveNet — running entirely client-side for zero backend inference latency.
- Built scalable RESTful APIs with Node.js and Express.js to manage user profiles, workout history, and exercise plans, backed by MongoDB; integrated Firebase Authentication for secure sign-in and session management.
- Designed a responsive React.js dashboard with live pose skeleton overlay, rep counter, form accuracy scoring, and progress analytics — supporting Push-ups, Squats, and Crunches with angle-based form detection.
- flex-it-out.vercel.app

Kron.security | *Next.js, React.js, TypeScript, Tailwind CSS, React Three Fiber*

Mar. 2026 – Apr. 2026

- Built a multi-page, fully responsive cybersecurity company web application using Next.js and TypeScript, with dedicated landing and pricing pages optimized for performance and cross-browser compatibility.
- Integrated React Three Fiber to implement immersive 3D WebGL animations and visual effects, delivering a high-impact UI with smooth scroll-to-section routing that functions seamlessly across all pages.
- Structured the full codebase in modular, reusable React.js components following clean code practices, with Tailwind CSS for scalable, consistent responsive web design throughout.
